

D1
cont. 12 in said irradiated plane, radiant energy of radiation at a wavelength in
13 a range of 1100 nm to 2.5 μ m is greater than zero and smaller than radiant energy
14 of radiation at a wavelength in a range of 600 nm to 1100 nm.

D2 1 17. (Twice Amended) A radiant energy radiation apparatus
2 according to claim 1, wherein said means for radiating radiation in the predetermined
3 wavelength range radiates radiation having a low visibility for a human within the
4 range of 600 nm to 1100 nm and which deeply permeates into an organism to
5 maintain/promote biofunctions.
